

CigaretteBuster™

Wireless Central Office System

The advantages are clear!

The most popular non-smoking enforcement system in the world

It's Successful!

Continuous and automatic monitoring eliminates smoking in bathrooms, stairwells, and other areas designated as non-smoking

It's Cost-Effective!

Pays for itself in a few months by freeing staff from routine bathroom patrol

It's Impartial!

Decreases complaints about non-smoking rules violations

It's Simple!

Easy to install and low maintenance

Praise for CigaretteBuster™

High school teacher Dick Austin observed immediate elimination of both smoking and the need for teachers to act as monitors and said "I can't praise it enough"

How the CigaretteBuster™ Wireless Central Office System works:

Detectors (shown on left), placed in up to 8 restrooms or other areas where smokers congregate, sense any illicit smoking. Each triggers receiver, in central office with LED (shown on right) identifying which area smoker is in. Staff can respond before smoker has left the area!

Proven results in high schools, colleges, hotels, airports, factories, and hospitals for over 10 years.

We also carry detectors for local rules enforcement, long or short range wireless systems and wired systems. Call us to help you determine which approach best suits your site.
Stop non-smoking policy abuse
