Dear Sir:

I am writing to tell you how much we love your product. I had never heard of a flame detector system before until we visited another school. The first week it was installed the pagers were going off like crazy. There are 4 administrators (2 – male and 2 – female) and we started making it a competition of which group would catch the most kids. We caught 50+ the first week. The next week, we were down to 30+ with the following week maybe just 5+ if we stretched it. Our competition was over. ☺

The students started wearing "the patch" to help them make it through the day without smoking. Students were trying to figure out how we knew. Finally the students just gave up. We have never told them how we know although they have had fun trying to figure it out. After the first two weeks we no longer had a smoking problem in our building and it continues to be true today 3 years later. We only hear the beepers go off once or twice at the beginning of every school year and when ever there is a new student in the building. Yelp the new students quickly learn the hard way not to smoke in our building.

I have bragged to other schools about being able to eliminate smoking. We had some visitors to our school from the Fern Creek area in Louisville and I demonstrated it to them. They wanted to know the address and phone number to contact you. I don't know if they did or not but they were foolish if they didn't.

Our initial cost was well worth the money. You have been very kind in servicing or replacing detectors and pagers as needed. I highly recommend your product and have done so on many occasions.

Kathryn F. Wright
Associate Principal

Our mission is to care for all students, to engage them in learning, and to prepare them for the future.
