

CigaretteBuster™

Wi-Fi-Enabled Enforcement System

The advantages are clear!

The most popular non-smoking enforcement system in the world

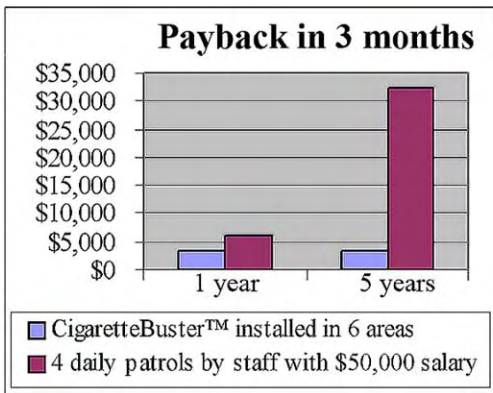

It's Successful!

Continuous and automatic monitoring eliminates smoking in bathrooms, stairwells, and other areas designated as non-smoking

It's Cost-Effective!

Pays for itself in a few months by freeing staff from routine bathroom patrol

It's Impartial!

Decreases complaints about non-smoking rules violations

It's Simple!

Easy to install and low maintenance

Praise for CigaretteBuster™

High school teacher Dick Austin observed immediate elimination of both smoking and the need for teachers to act as monitors and said "I can't praise it enough"

How the CigaretteBuster™ Wi-Fi System works:

Detectors (shown on left) can be placed in an unlimited number of restrooms or other areas where smokers congregate. Detector senses any illicit smoking and alerts administrator via cell phone (shown on right) or laptop. Message identifies which area smoker is in. Staff are alerted anywhere, anytime and can respond before smoker has left the area!

Phone Alerts Administrator identifying smoker location

Proven results in high schools, colleges, hotels, airports, factories, and hospitals for over 10 years.

We also carry detectors for local rules enforcement, short range and long range wireless systems, and wired systems. Call us to help you determine which approach best suits your site. **Stop non-smoking policy abuse**
