Director of Technology

August 20, 2012

Cigarette Buster System has eliminated students smoking in our bathrooms as well as locker rooms. The students are unable to smoke which has led to a reduction of suspensions as well as students being cited through the local authorities for smoking on school grounds. The pager system allows notification as soon as a student starts to light up a cigarette, which in turn has an administrator go to the exact spot to catch the students. The Cigarette Buster System has been a valuable asset for our school to eliminate smoking in the school.

Thank you,

Hal Minford
