Dear Voice Products,

We use your ***Cigarette Buster*** devices in a group home setting, we started off with 3 sensors and recently ordered additional sensors. With all of our safety measures being used at the group home, limiting/stopping smoking in the group home could be/is extremely challenging. Since using your devices, smoking is being detected instantly, allowing us to address the issue instantly vs finding/smelling the evidence of smoking later. I recommend this product for any establishment where smoking is prohibited, especially where others safety/health is being impacted by cigarette smoke.

Thank You, we're looking forward to continuing business with you.
